PROFILE

Master's student in Data Science at Université Paris-Saclay with strong expertise in machine learning, deep learning, and computer vision. Experienced in developing AI models using Python, PyTorch, and modern deep learning frameworks, with a strong interest in building robust ML pipelines and applying AI to real-world problems.

EXPERIENCE

- **Audensiel** 
AI Engineer Intern Apr 2026 – Oct 2026
Boulogne-Billancourt, France
 - Developing a drone-based AI decision-support POC for flood rescue operations.
 - Building a synthetic multi-modal flood dataset (RGB, depth, semantic segmentation, and LiDAR) using Unreal Engine 5.5 and Cosys-AirSim across diverse flood scenarios.
 - Developing person and obstacle detection in flooded environments by fine-tuning YOLOv26 and semantic segmentation models to identify flooded and non-flooded areas.
 - Estimating flood risk for detected individuals to support rescue prioritization.
 - Developing a real-time visualization interface to support decision-making during flood rescue operations.
- **AI Farms Co., Ltd.** 
AI Engineer Intern May 2025 - Aug 2025
Phnom Penh, Cambodia
 - Developed a proof-of-concept vision-based speaker detection system using video input. 
 - Modeled spatial and temporal patterns in face sequences using a CNN-LSTM architecture.
 - Built a reproducible pipeline for data preprocessing, feature extraction, model training, and evaluation using Python, PyTorch, OpenCV, and YOLOv8.
 - Evaluated CNN backbones (ResNet-50, EfficientNet-B0) on 3,786 labeled video scenes, achieving up to 72.95% F1-score on a held-out test set.

EDUCATION

- **Université Paris-Saclay**
Master's Degree (M2) in Data Science: Health, Insurance and Finance Sep 2025 - Expected Nov 2026
Évry, France
- **École Nationale Supérieure d'Informatique pour l'Industrie et l'Entreprise (ENSIIE)**
Double Engineering Degree in Applied Mathematics (ITC-ENSIIE) Sep 2024 - Expected Nov 2026
Évry, France
- **Institut de Technologie du Cambodge (ITC)**
Engineering Degree in Data Science Oct 2020 - Jul 2025
Phnom Penh, Cambodia

SELECTED PROJECTS

- **Kaggle Competition: House Price Prediction**
Python, Pandas, NumPy, Scikit-learn, XGBoost 
 - Ranked in the top 1% (56th out of 6,980 teams) in the Kaggle House Price Prediction competition (RMSE of 1206), using feature engineering and ensemble methods (XGBoost).
- **Sorbonne Data Challenge: Malware Detection**
Machine Learning, XGBoost, Feature Engineering, SVD 
 - Ranked 8th out of 85 teams in a malware detection challenge (Sorbonne University), building an XGBoost classifier on control-flow-graph data across 453 malware families (macro F1 = 0.59).

SKILLS

- **Programming Languages:** Python, R, C++, SQL, Git
- **Libraries:** PyTorch, TensorFlow, scikit-learn, OpenCV, pandas, NumPy
- **Machine Learning:** Deep learning, computer vision, transformers, NLP, regression, classification, clustering, time series forecasting, survival analysis
- **Data & Visualization:** Data cleaning, feature engineering, pipeline design, Matplotlib, Seaborn, Power BI

HONORS & AWARDS

- **Sophie Germain Scholarship** 2024

Fondation Mathématique Jacques Hadamard (FMJH)
 - Awarded a merit-based excellence scholarship to pursue a Master's degree in France (also selected for the Eiffel Excellence Scholarship, Campus France).

LANGUAGES

Languages: English (C1-Fluent), French (B1-Intermediate), Khmer (Native)
